

Adventure Medical Kit Backpacker Series First Aid Kit

Features:

- **Wilderness First Aid Manual** – Know how to treat common backcountry injuries and illnesses with the up-to-date wilderness first aid information in the included hiking first aid guide.
- **Find it Fast Design** – Find supplies quickly using the external kit map for fast reference of all kit contents and the Easy Care First Aid System, which organizes contents by injury into clearly-labeled pockets.
- **Hospital-Quality Wound Care** – Clean and close injuries with supplies that set the standard in backcountry medicine, including an irrigation syringe, butterfly bandages, tincture of benzoin, and a variety of dressings.
- **Trauma Supplies** – Stop bleeding quickly with a large trauma pad to control bleeds from severe falls. Stabilize sprained ankles or strains with the elastic bandage so you can hike out safely.
- **Backcountry Medications** – Manage fevers, stomach aches, pain, and allergies until medical help can be reached. This medical bag contains multiple doses of common medications to keep you going on longer trips.
- **Blister Prevention & Protection** – Stop blisters before they start with moleskin, the most reliable dressing to reduce friction and prevent the #1 hiking injury. The 14 die-cut pieces are shaped to fit common problem areas.
- **For 1-2 People on an Extended Weekend Trip** – Designed for 2 people for 4 days on your camping or hiking trip.
